Problem

GiveCampus University — who needs attention

A 40-hour week buys about 149 personal touches.
That is 0.7% of the database. Which 149?

Autopilot

Account

Connect to Outlook

Use the same kind of sign-in as outlook.com. When Microsoft asks, choose **Allow** so DonoRex can see when you're free. Not sure which type you use? Try personal first (most @outlook.com and @hotmail.com accounts).

Connect — personal (outlook.com)

Connect — work or school

Build my week

GiveCampus University — Prioritize fundraising work against your real Outlook availability when connected. Planning stays local until you approve tasks; Outlook changes only after Autopilot confirmation.

Fundraising objective

- ☒ Protect renewals
- ☐ Maximize near-term dollars
- ☐ Grow recurring giving
- ☐ Reactivate lapsed donors

Fundraising time budget this week

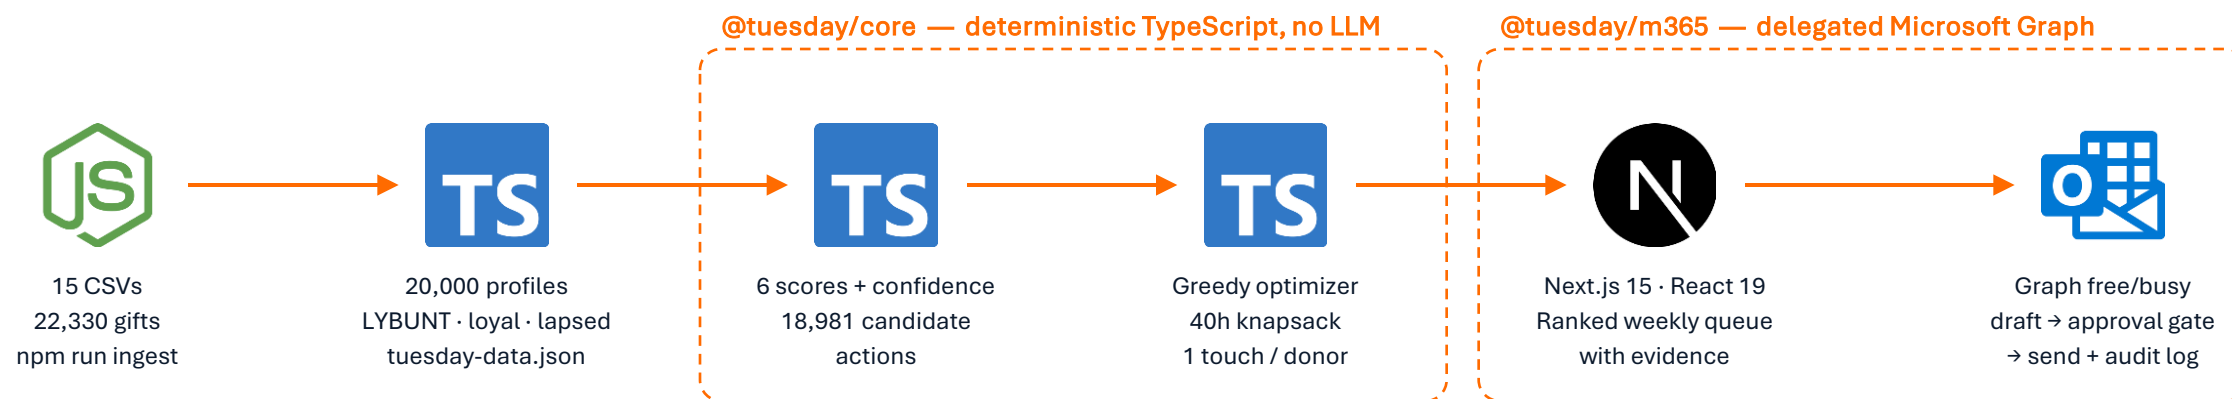

Full-time is 40 hours (Mon–Fri, 9:00–5:00). Calendar planning uses the same 9–5 window.

20h

Thank you for your support — GiveCampus University

Dear Ava,

Thank you for your continued generosity and for taking time to engage with our advancement team this week. Your support helps us prioritize student-facing programs and stewardship that donors can see and trust.

This message is a demo draft in DonoRex Autopilot – approve it below to send through your connected Microsoft 365 mailbox.

With gratitude,
Your GiveCampus University advancement team

Emails need your approval before they send.

Approve sendReject

- Drafts are grounded in that donor's real giving history — nothing invented
- Sends and calendar invites are approval-gated in policy, not just in the UI
- Delegated scopes only · AES-256-GCM token cache · full audit log

Weaknesses

- Greedy optimizer — near-optimal, not provably optimal
- Opportunity dollars are planning estimates, not causal lift
- Segments match intent templates, not a language model
- Feedback is browser-local — no trained model yet
- Recurring Autopilot tasks need “Run now” — no scheduler

Thank you

- GiveCampus
- HackMIT organizers
- Our mentors
- Rex, our very good dinosaur
